

WHAT IS CLAIMED IS:

1. An acrylic elastomer composition, which comprises (A) a halogen-containing acrylic elastomer, (B) a polyvalent carboxylic acid, (C) a quaternary onium salt and (D) a hydrotalcite.
2. An acrylic elastomer composition according to Claim 1, wherein the polyvalent carboxylic acid is an aliphatic polyvalent carboxylic acid having 4 to 30 carbon atoms, alicyclic polyvalent carboxylic acid, aromatic polyvalent carboxylic acid or anhydride thereof.
3. An acrylic elastomer composition according to Claim 1, wherein the polyvalent carboxylic acid is used in an amount of 0.1 to 10 parts by weight on the basis of 100 parts by weight of the halogen-containing acrylic elastomer.
4. An acrylic elastomer composition according to Claim 1, wherein the quaternary onium salt is used in an amount of 0.1 to 10 parts by weight of the halogen-containing acrylic elastomer.
5. An acrylic elastomer composition according to Claim 1, wherein the hydrotalcite is used in an amount of 0.5 to 20 parts by weight on the basis of 100 parts by weight of the halogen-containing acrylic elastomer.
6. An acrylic elastomer composition according to Claim 1, wherein a higher fatty acid polyhydric alcohol ester or a higher aliphatic amine is further contained as a lubricant.
7. An acrylic elastomer composition according to Claim 6, wherein the higher fatty acid polyhydric alcohol ester or the higher aliphatic amine is used in an amount of 0.1 to 10 parts by weight of the halogen-containing acrylic elastomer.
8. An acrylic elastomer composition according to Claim 1, wherein ureas are further contained as a vulcanization retardant.
9. An acrylic elastomer composition according to Claim 8, wherein the ureas are used in an amount of 0.1 to 10 parts by weight of the halogen-

containing acrylic elastomer.

10. A vulcanization molding product obtained by vulcanization molding of an acrylic elastomer composition comprising (A) a halogen-containing acrylic elastomer, (B) a polyvalent carboxylic acid, (C) a quaternary onium salt and (D) a hydrotalcite without any secondary vulcanization.

11. A vulcanization molding product according to Claim 10, wherein the acrylic elastomer composition further containing a higher fatty acid polyhydric alcohol ester or a higher aliphatic amine as a lubricant is used.

12. A vulcanization molding product according to Claim 10, wherein the acrylic elastomer composition further containing ureas as a vulcanization retardant are used.
